Summary

Junior Full Stack Developer with hands-on experience building and deploying real-world applications using HTML, CSS, JavaScript, React, React Native and Flutter. Published app on Google Play and developed several apps: real-time chat system using Firebase Authentication and Firestore, Budget tracker, Weather app and more. Strong understanding of REST APIs, and backend using Node.js and .Net.

Skills

- Dart / C# and C++
- JavaScript / TypeScript
- React Native / Flutter
- Responsive UI
- SQL / Data Management
- HTML / Tailwind CSS
- REST APIs / JSON
- Firebase Auth
- GitHub / CI/CD
- Linux
- Provider / SetState
- State Management
- Google Play deployment
- Debugging
- Node.js / .NET

Website, Portfolio, Projects

<https://chuksdev.vercel.app> | <https://github.com/chuks4code>

Trivia Trek — Mobile Application | Flutter

- Built and deployed a full-featured trivia/quiz application to the Google Play Store.
- Implemented scoring logic, state management, reusable UI components, and user input.

Real-Time Chat Application | React Native Expo, Firebase

- Developed authentication and real-time messaging using Firebase Authentication and Firestore.
- Implemented route protection, global chat, private messaging, and reusable UI components.

Weather Shine | Flutter, REST APIs

- A live weather application consuming three REST APIs with error handling and dynamic data.

Budget Pal | React Native

- Personal finance app focused on income/expense tracking with a clean, user-friendly interface.

Education & Certificates

IBM Full Stack Web Developer — **Coursera** | Google Data Analytics — **Coursera** | React Native: Developing Android and iOS Apps — **Coursera** | Flutter Development Bootcamp — **Udemy**
Electronics Engineering Technician Program — **Seneca Polytechnic, Ontario, Canada**

Experience

Web / App Developer — Independent Projects

Built cross-platform applications and integrated Firebase authentication, real-time databases, REST APIs, Designed responsive Web/ Android/iOS interfaces, implemented state management, version control Managed projects from development through testing, deployment, and production release.

Traffic Signal Technician | Current Role

Troubleshoot and maintains city's traffic signal infrastructures, complex technical systems with strong attention to detail, safety, reliability, and problem solving.
